

Solvent Tank

Plenty of users felt and had a headache,

“ Solvent tank is easy to be broken soon “

“ it is also dangerous.”

Plastic solvent tank was standard equipment for viscosity controller

It had been, so to speak, the common sense for viscosity controller before Viscon.

Viscon developed and equipped Stainless Steel solvent tank as standard,
for solving users headache.

Viscon stainless steel solvent tank is not only durable or safe,
but also convenient for users because of big capacity 16Ltr capacity.

Users can reduce times to refill solvent.

VISCON Standard equip
Stainless steel tank 16 Ltr

Plastic solvent tank - Easy to be broken soon. Dangerous

(Stand : option)
